

Hanumanth Reddy Barla

Fort Mill, SC 29707 | (810) 493-7039 | hanureddy4268@gmail.com | [LinkedIn Profile](#)

Professional Summary

Senior AEM Full Stack Lead and Adobe Certified Professional with 10+ years of hands-on experience architecting and delivering enterprise-scale digital experience platforms for Fortune 500 companies including HD Supply, American Express, Verizon, and Cummins. Expert practitioner across the full Adobe ecosystem — AEM 6.x, AEM as a Cloud Service, Edge Delivery Services (EDS), Adobe Experience Platform (AEP), Adobe Journey Optimizer (AJO), Real-Time CDP, and Customer Journey Analytics (CJA). Certified in both AJO and Real-Time CDP Business Practitioner disciplines, with proven ability to design and deploy event-triggered customer journeys, real-time audience segmentation, offer decisioning, and cross-channel personalization at scale. Consistently delivers measurable business impact — 50% reduction in page load times via AEM Cloud and EDS caching, 30% CDN latency reduction, 40% decrease in video buffering, and 25% uplift in user engagement. Deep technical fluency across HTL, Sling Models, OSGi, React SPA, headless AEM via Content Fragments and GraphQL, identity resolution, GDPR/CCPA data governance, and CI/CD pipeline automation. Equally effective as an individual contributor and technical lead — defining engineering standards, driving AEP personalization roadmaps, and bridging business stakeholders with offshore delivery teams across Agile/Scrum engagements.

Certifications

- Adobe Certified Professional – Adobe Journey Optimizer Business Practitioner
- Adobe Certified Professional – Adobe Real-Time CDP Business Practitioner

Technical Skills

AEM & Adobe Cloud: Adobe Experience Manager (AEM 6.x, AEM Cloud Service), Edge Delivery Services, HTL (Sightly), Sling Models, OSGi/Felix, JCR, CRXDE, AEM Touch UI, DAM, CRX

Adobe Experience Platform: Adobe Journey Optimizer (AJO), Real-Time CDP, Customer Journey Analytics (CJA), Adobe Target, Adobe Campaign

Frontend: React, Angular 6, JavaScript (ES6+), HTML5, CSS3, jQuery, Ajax, DOM Purify, html-react-parser

Backend & Build: Java, Apache Sling, Maven, Apache Solr, RESTful APIs, OSGi bundles, Jenkins, Docker, AWS

Dev Tools & Practices: GIT, Confluence, Workfront, Agile/Scrum, CI/CD pipelines, SSL/TLS, SEO, ADA/accessibility

Work Experience

SR AEM Full Stack Lead

HD Supply | Atlanta, GA | January 2023 – March 2026

- Architected scalable, component-based AEM solutions for high-traffic e-commerce platforms, driving a 25% increase in user engagement through optimized content delivery.
- Implemented AEM as a Cloud Service with Edge Delivery Services (EDS), delivering content closer to users and achieving a 50% reduction in page load times via caching strategies.
- Built edge-ready AEM components using HTL, Sling Models, and React; applied DOMPurify and html-react-parser for secure HTML rendering from AEM.
- Integrated Adobe Journey Optimizer (AJO) with AEP Real-Time Customer Profiles to orchestrate event-triggered journeys; implemented offer decisioning and eligibility rules within AJO.
- Integrated Customer Journey Analytics (CJA) with AEP datasets to enable cross-channel reporting and insights.
- Configured and managed Agile workflows in Workfront — including sprint planning, story estimation, and backlog prioritization — integrating with AEM project delivery milestones.
- Integrated third-party APIs within AEM for real-time inventory and location service updates across digital properties.
- Collaborated with content authors to design user-friendly templates and configurations in AEM Touch UI.

- Defined technical roadmaps and established engineering standards for AEP-driven personalization, translating business objectives into functional and technical requirements through structured discovery sessions.
- Designed database schemas to support personalization use cases within AEP, enabling structured storage and retrieval of customer profile and behavioral data.
- Assisted with AI-driven personalization initiatives, leveraging AEP Real-Time Customer Profiles to deliver contextually relevant experiences across digital channels.
- Defined standards for Identity Resolution and profile integrity within AEP; established data governance practices ensuring GDPR and CCPA compliance across upstream and downstream data flows.
- Integrated AEP with CRM platforms and cloud systems, mapping upstream and downstream data pipelines to support segmentation strategies aligned with sales, customer intelligence, and feature development goals.
- Evaluated and utilized MarTech tools including Salesforce and CRM systems to strengthen personalization capabilities and align marketing technology with business outcomes.

SR AEM Developer

American Express (via TekSystems) | New York, NY | June 2022 – January 2023

- Designed and built responsive web applications using AEM 6.5, JavaScript, HTML, CSS, Ajax, and jQuery.
- Developed and implemented custom templates, components, dialogs, widgets, and workflows for enhanced site functionality.
- Configured AEM Web Content Management and Apache Felix Admin Console for optimal performance.
- Leveraged global CDN to accelerate content delivery, reducing latency by 30%.
- Implemented SSL/TLS encryption and DDoS protection for secure, high-availability content delivery.
- Analyzed performance metrics to optimize configurations, achieving a 15% improvement in page load times.
- Collaborated with engineering teams to integrate AEM Publish and Dispatcher tiers with CDN configurations for streamlined, high-performance content management.
- Developed and registered custom OSGi services and components within AEM to extend platform capabilities and support complex business logic.
- Implemented AEM Sling Servlets and Sling Models to expose content and data via RESTful endpoints consumed by frontend applications.
- Managed AEM DAM workflows for asset ingestion, metadata tagging, and rendition generation, improving content author productivity and asset governance.
- Integrated Adobe Analytics with AEM using Launch (DTMM) to capture granular user interaction data, enabling data-driven content optimization and A/B reporting.
- Implemented Adobe Target activities within AEM SPA Editor to deliver server-side and client-side personalization experiments for authenticated and anonymous users.
- Built AEM SPA components using React and the AEM SPA Editor SDK, enabling in-context authoring of single-page application content by business teams.

SR AEM Developer

HD Supply | Atlanta, GA | October 2020 – June 2022

- Gathered and translated business requirements into modular AEM component designs informed by UX wireframes.
- Developed applications in AEM using CRXDE; implemented AEM Dispatcher caching rules and CDN-level caching strategies, reducing page load times by 50%.
- Optimized video delivery through AEM-integrated CDN configurations and adaptive streaming, decreasing buffering time by 40%.
- Managed JavaScript and CSS resources via AEM Client Library for streamlined frontend development.
- Maintained solution design documentation on Confluence to support team efficiency and knowledge transfer.
- Built and maintained custom AEM workflows for automated content review, approval, and multi-channel publishing, reducing manual authoring effort.
- Configured AEM replication agents and dispatcher flush rules to ensure consistent and reliable content propagation across publish and CDN layers.
- Leveraged AEM Content Fragments and Experience Fragments to enable headless content delivery and reuse across web, mobile, and third-party channels.

- Developed React-based AEM components integrated via the RemoteApp pattern, bridging server-rendered AEM content with client-side React state management.
- Configured Adobe Analytics data layer (ACDL) within AEM to standardize event tracking across components, feeding downstream reporting in Adobe Workspace.
- Set up Adobe Target auto-personalization and Recommendations activities surfaced through AEM, improving product discovery engagement metrics.

SR AEM Developer

Verizon | Dallas, TX | June 2019 – September 2020

- Designed and built AEM components, templates, dialogs, and workflows aligned to brand and functional requirements.
- Managed AWS services and created automated deployment pipelines for Docker containers.
- Led requirement analysis sessions and acted as liaison between business stakeholders and offshore implementation teams.
- Developed strategic metadata and SEO best practices; conducted ADA knowledge transfer with UI Development teams.
- Configured AEM Dispatcher caching rules and URL mapping to optimize request handling and reduce load on publish instances.
- Developed custom AEM event listeners and schedulers using OSGi to automate background content maintenance tasks and data synchronization.
- Utilized AEM Multi-Site Manager (MSM) and Live Copy to manage content across multiple brand sites, ensuring consistent structure while supporting regional variations.
- Implemented AEM-integrated React micro-frontends using the SPA Editor framework, allowing content authors to manage React component props directly in Touch UI.
- Instrumented AEM pages with Adobe Analytics custom eVars, props, and events via Adobe Launch rules to support funnel analysis and conversion tracking.
- Configured Adobe Target Experience Targeting (XT) and Multivariate Testing (MVT) activities within AEM to optimize landing page layouts and CTA performance.

SR AEM Developer

PeakActivity | Boynton Beach, FL | October 2018 – May 2019

- Developed digital consumer experiences using Adobe AEM product suite including CRX, Target, and DAM.
- Integrated content-driven AEM applications with e-commerce solutions and analytics tools.
- Configured AEM Cloud Service environments following Adobe best practices for efficient deployment pipelines.
- Implemented user interfaces using Angular 6 MVC framework with JavaScript, HTML5, and CSS3.
- Designed and implemented AEM page templates using editable template editor, enforcing layout policies and component allowlists to standardize authoring across teams.
- Configured AEM user groups, permissions, and closed user groups (CUGs) to enforce role-based access control across content authoring environments.
- Utilized AEM Core Components and WCM Core as the foundation for extensible, accessible, and upgrade-friendly component development aligned with Adobe best practices.
- Developed React components consumed by AEM via the SPA Editor, enabling dynamic content rendering while preserving full authoring capability in AEM Touch UI.
- Integrated Adobe Analytics via AEM's built-in Adobe Launch extension, setting up data layer events for page views, component interactions, and conversion goals.
- Leveraged Adobe Target within AEM to configure experience fragments as offers, enabling personalized content delivery based on audience segments and geolocation.

SR AEM Developer

LiquidHub | Columbia, SC | June 2018 – September 2018

- Developed reusable AEM templates and components; created servlets for backend dealer information services.
- Migrated project from AEM 6.2 to AEM 6.4, improving system performance and stability.
- Integrated AEM with Apache Solr to optimize search functionalities across the platform.

- Implemented AEM content package management for structured deployment of code, configurations, and content across dev, staging, and production environments.
- Wrote JUnit tests for AEM backend services and integrated testing into the Maven build pipeline to maintain code quality and catch regressions early.
- Built reusable React components mapped to AEM Content Fragments via GraphQL API, supporting headless delivery of structured content to web and mobile consumers.
- Integrated Adobe Analytics tag management within AEM Client Libraries, implementing custom tracking for component-level events and user journey milestones.
- Configured Adobe Target within AEM to deliver rule-based content swaps using Experience Fragments as Target offers, enabling business-managed personalization.

SR AEM / AEM Developer

Cummins | Columbus, IN | May 2017 – May 2018

- Built robust web pages and reusable templates using AEM, JavaScript, HTML, CSS, Ajax, and jQuery.
- Designed AngularJS add-on library enabling W3C Custom Elements integration; implemented Adobe Campaign for targeted campaigns.
- Wrote high-level technical designs and assigned/reviewed detailed coding tasks across the team.
- Developed custom AEM dialogs using Coral UI and Granite UI, enabling intuitive component configuration for non-technical content authors.
- Implemented AEM Query Builder and JCR-SQL2 queries for efficient content retrieval and reporting, tuning indexes via Oak to avoid repository traversal.
- Managed AEM environment upgrades and hotfix installations, coordinating with Adobe support and testing across author, publish, and dispatcher tiers.
- Developed AEM components with embedded React for interactive UI features, using the clientlib build pipeline to bundle and serve optimized React bundles.
- Set up Adobe Analytics report suites and classification rules within AEM Launch integration to segment traffic by campaign, content type, and user persona.
- Implemented Adobe Target within AEM to run A/B tests on key landing pages, using response tokens to pass test variant data into Adobe Analytics for unified reporting.

AEM Developer

Consuptra Info Solutions | India | May 2014 – June 2015

- Managed AEM environment, supervised CQ authors and publishers, and developed templates, components, and custom OSGi bundles.
- Integrated Google Analytics with AEM for user activity tracking; executed weekly builds using GIT and Jenkins.
- Coordinated security reviews for compliance and provided technical support during UAT.
- Developed AEM Sling resource resolvers and resource mappings to support clean URL structures and multi-tenant content routing.
- Configured AEM replication and reverse replication agents to manage content activation and user-generated content flows between publish and author instances.
- Developed AEM HTL components with React hydration patterns for progressively enhanced UI experiences, maintaining SEO-friendly server-side rendering.
- Instrumented AEM templates with Adobe Analytics beacon calls using `s.t()` and `s.tl()` methods, providing page-level and link-level tracking for stakeholder dashboards.
- Integrated Adobe Target mbox calls within AEM page templates to enable basic A/B testing of hero content and navigation layouts during early personalization initiatives.

Education

Master of Science in Computer Information Systems

University of Michigan | Flint, MI | April 2017

Bachelor of Engineering in Electronics and Communication Engineering
